

EXZEL SMART HOME MULTIROOM AUDIO & VIDEO SYSTEM
WHATEVER MOVIE YOU DESIRE – NO UGLY WIRE AND BULKY AV GEARS ON SIGHT

LESS IS MORE

Sometimes, it is better that all the dangling cords and many pieces of AV gears have it place – somewhere else that is not distracting your TV watching experience. If you are a “LESS IS MORE” believer, Exzel Smart Home can help you with our Multiroom Audio & Video system. Our AV experts are here to help.

How? We could place all your AV gears: being your cable TV set top boxes, Blu-Ray Players, Video-On-Demand Player systems in its place and only send one signal cable to the back of your TV. This will leave your TV location cleanest. It is only your TV that deserves its place there.

Architectural Speaker System

With our architectural speaker system, we can manage all speaker wire to be hidden in wall or above ceiling.

Home-Theater-from-Above in ceiling speaker system from TruAudio has won many industry awards from U.S. It is proved in many projects to be the best way to manage your speaker wire and bulky speaker in the cleanest possibility.

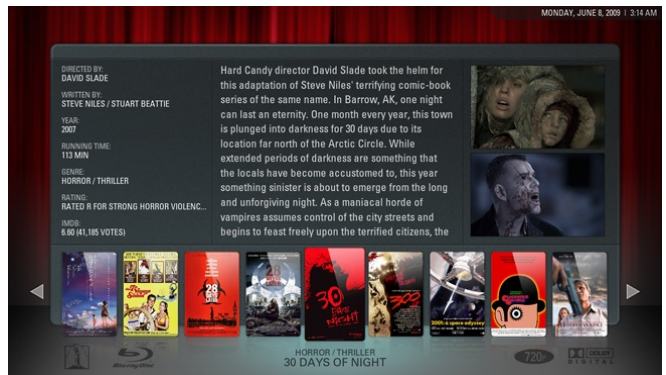

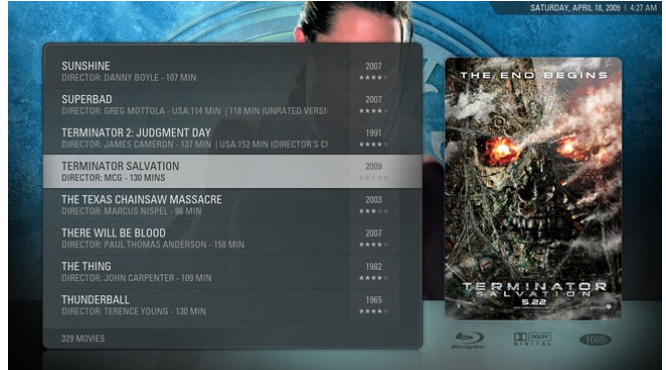

Our **Acoustic Artwork Speaker: Speakers hiding in your artwork of choices** from Truaudio (shows in picture to the right) also helps you fuse your passion of art for music and distinctive design.

VIDEO ON DEMAND SYSTEM

With the new era of digital media, there are many video on demand systems for you to choose from. Exzel Smart Home has been a key player in this technology in Thailand even long before its first introduction to Thailand market. We can help you design the best system that suits your needs and budget. Being 1080P, 3D, Dolby TruHD, or DTS HD Master Audio, Movie Server, Video On Demand. You name it! We can customize the best solution that fits your needs.
