- Please add 7% VAT (Value Added Tax) to all prices.

Hi Light Features of Package 11

DSC Alexor

Alexor is a wireless control panel, the virtual "brain" of the security suite. Because it is a distributed system, the panel is not attached to the keypad physically, but rather wirelessly. Designed for flexible, secure installation locations within the home, as long as there is access to AC power, Alexor operates via up to four wire-free keypads (the WT5500). If the system changes its armed state or a wireless device is tampered with, Alexor will immediately be signaled and the appropriate transmission will instantly be transmitted to the monitoring station. And because the signals between Alexor Wireless Panel and its wireless peripherals are fully encrypted, communication between all devices is exceptionally secure. The Alexor offers all the reliability of traditional wired/hybrid control panels but with all the convenience that wireless delivers.

Features

- Separate the control panel or "brain" of the system from the wireless keypad: This makes Alexor perfect for wireless installation without the "smash-and-grab"* risk of typical self contained wireless security system.
- Supports 32 wireless zones and 16 wireless keys (without using a zone slot)
- 16 user codes, 1 master code and 1 maintenance code
- Alternate communications via GSM/GPRS and IP (optional module required)
- Local and remote downloading (optional module required)
- 500 event buffer
- 4 communication phone numbers
- 2 Input/ Output terminals
- Front and back tamper
- Onboard Siren at 85dB
- False alarm reduction features (CP-01)

"Smash-and-grab"* is a typical term used in security risk found in All-In-One integrated wireless security system or self-contained security system. If a criminal breaks in and hears a beeping "keypad" right next to the door, they very easily could destroy the device. All of these instances would leave your location vulnerable as the panel has been defeated before it could send out the alarm signal to the central alarm monitoring station.

DSC WT5500: 2-Way wireless, wire-free keypad

- 2x16 full message display
- Intuitive clock programming
- Multiple door chime
- Ambient light sensor
- Display and keymat backlighting
- Outdoor temperature display (when use with WT4911, 2-way wireless outdoor sounding siren with strobe)
- Wall and optional Deskstand mount
- Multi-Language support
- 5 programmable function keys
- 3 one-touch emergency keys
- Tamper switch
- Nominal battery life - 3 years

DSC WS4904P: Wireless Pet-Immune Infrared Detector

- Based on the Bravo 3D hardwire motion detector
- High-traffic shutdown
- features pet immunity up to 60 lbs (27 kg)

DSC WT4989: 2-way Wireless key with ICON and buzzer (keyfob)

- Backlit icon display
- Built-in buzzer for audible feedback
- Key tactile feedback
- 4 one touch function keys, programmable for up to 6 functions
- Status button indication
- Active alarm indication
- Water resistant
- Multifunction clip
- Nominal Battery life - 3 years

DSC WS4939: Wireless key (keyfob)

- Durable, scratch-resistant buttons
- 4 programmable function keys
- Long-life lithium batteries included
- Full 3-second delay on panic alarm to reduce false alarms
- Multifunction belt clip included

- Optional generic rubber insert included
- Water resistant

DSC WS4916: Wireless photoelectric smoke and heat detector

- Automatic drift compensation
- Built-in, dual-sensor heat detector with fixed heat and rate of rise
- Built-in 85 dB horn
- Local test button
- Low profile design
- High/Low sensitivity reporting
- Low battery indication
- Easy-maintenance removable smoke chamber
- Long-life lithium batteries

DSC WS4945: Wireless door/window contact

- Built-in reed switch
- Normally closed external contact input
- Case and wall tamper

DSC WT4911: 2-way wireless outdoor siren sounding with strobe (Flash light)

- Completely wire free solution: no wire back to the control panel or wire from power supply required (powered by type “D” lithium cell) – This make it perfect for renovation project (existing house that is wall and ceiling finished and owner wants to minimize drilling holes or wiring wires/cables throughout the house).
- Siren Output – 105dB
- Siren sounds for alarms and squawks
- Strobe light functionality for visual indication
- Provides temperature to WT5500 Wire-free keypad
- Local and remote test capability
- Transmits RF status, low battery and tamper condition
- Front and back tamper detection
- IP34 rating
- Nominal battery life - 4 years

DSC WT4901: 2-way wireless outdoor siren sounding

- Siren Output – 85dB
- Siren sounds for alarms, door chimes, entry/exit delay and troubles
- Onboard test button

- Transmits RF status, low battery and tamper condition
- Front and back tamper detection
- Nominal battery life - 2 years
